Accessing FPL Digital

For student access, copy the link, username and password from the group view page. Next, you can either email the information to students or post the link, username and password within your learning management system.

Students will be able to access FPL Digital by navigating to the group URL and entering the username and password provided.

Once logged in, students will see cover images of the books assigned to their group on the student dashboard.

Books that are available for reading will display a “Start Reading” button at the bottom of the cover image.

The group name will appear on the student dashboard.

Students will see a confirmation message once they log in.

URL provided by teacher from the group view page

This is the unique username and password you created for this group.

Students are prompted to contact you if they are having trouble logging in.
Books that are currently unavailable because the maximum number of copies are already being read will be greyed out and will display a “book unavailable” message.

To start reading, a student can click on the “Start Reading” button at the bottom of any book that is currently available in their group.

This will launch the reading pane for the book.
Students will see the book display in two-page spreads just like they would with a physical print book.

Students can use the book navigation buttons to move the pages forward or backwards or use the slider at the bottom of the screen to locate a specific page.

Once students are finished reading a book, they can exit the reader to return to the student dashboard or they can logout to exit FPL Digital.
